DETAILED ACTION

Response to Amendment

1. Applicant's amendments and accompanying remarks filed 12/10/03 have been entered and carefully considered. Applicant's amendment is not found to patentably distinguish the claims over the prior art and Applicant's arguments are not found persuasive of patentability for reasons set forth herein below.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-4, 6-8, 10-17, and 20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The originally filed specification fails to limit the disclosure to "only an outer" layer. This phrase is a negative limitation intended to exclude the presence of other layers. The originally filed specification fails to specifically provide support for such a limitation.

Claim Rejections - 35 USC § 103

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
5. Claims 1-4, 6-8, 10-17, and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gardill (5614285) in view of Hawley's Condensed chemical Dictionary (HCCD), as set forth in the previous three actions.

Applicant argues that Gardill fails to teach only an outer layer and instead teaches multiple outer layers. However, Gardill teaches "at least one outer layer," suggesting that only one outer layer can be used (abstract). Said rejection is maintained from the last action.
